LANGUAGES: JAVASCRIPT, REACTJS, jQUERY	**BACKEND**: NODEJS, RUBY	**DATABASES**: MYSQL/POSTGRESQL, MONGODB	

EXPERIENCE

SOFTWARE ENGINEER
February 2020–Present
nQ Medical, Cambridge, MA

-Subject matter expert for the nQ Platform and System. As a lead on the product team, completed the engineer testing of our software system submission to the FDA for clearance. Engaged with the team on documentation of the requirements and design of the product. Reviewed engineering documents to ensure accuracy. Instrumental in setting up the Pivotal Study environment and ensuring the meticulous details are addressed for the successful completion of the project.

-1.5+ years managing offshore teams in development and quality assurance for multiple products from mobile to web.

-Engineered multiple user-facing components on the frontend of our mobile app and platform to improve user experience.

-Engaged in the inception and execution of the new nQ Mobile App development within an 8-month timeframe. Worked closely with the UX design team in the development of the theme and wireframes. Ensured user feedback was collected and communicated appropriately to the most minute details.

-Debugging and Testing Lead on the development of our mobile application, as well as supporting broader testing of new instances in our nQ System software.

-Support multiple clinical studies in a timely manner and on short notice through onboarding process and troubleshooting.

SOFTWARE ENGINEERING IMMERSIVE FELLOW
October 2019–January 2020
General Assembly, Boston, MA

During this 13 week, 480+ hour immersive career accelerator, I engineered multiple full-stack projects, working individually and as a product lead on a team. While both covering and applying front- and back-end programming fundamentals, I trained with a variety of current programming languages, technologies, libraries and frameworks.

PROPERTY MANAGER
December 2016–February 2020
New England Flower Exchange, Chelsea, MA

Key player in initialization and development of a New England landmark's renovation, transition and growth while overseeing the following departments: accounting, leasing, event management, social media/web presence, maintenance, contract negotiations, employee relations and scheduling, plus managing B2B tenant relationships.
